

TA-851B

PACKING LIST

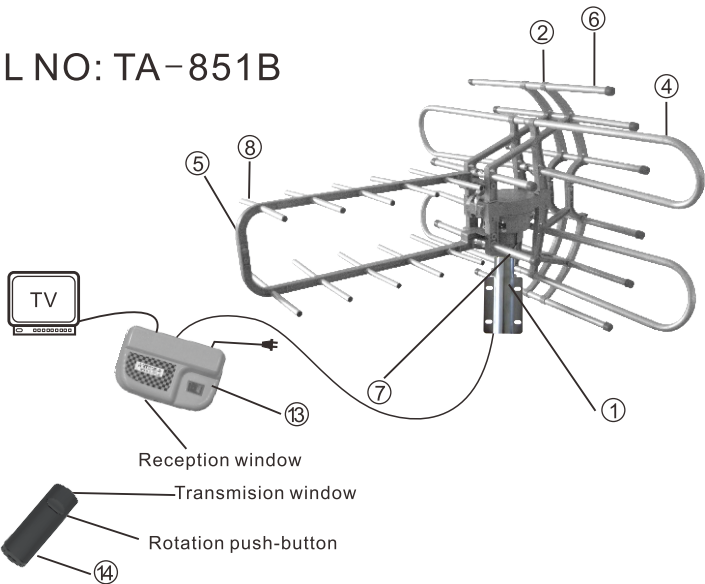

NO.	Name		Quantity	Image
①	m ain unit (built-in amplifier)		1	
②	Main unit support		4	
③	Instruction sheet		1	
④	VHF vibrator		4	
⑤	Plastic director support		2	
⑥	Reflector		6	
⑦	UHF dipole		4	
⑧	UHF director		20	
⑨	Attachment	Plastic connector	4	
⑩		Screw 3x8	14	
⑪		Screw 3x12	4	
⑫		Cap	16	
⑬	Power supply box		1	
⑭	Remote-controlled ware		1	

TV. REMOTE-CONTROLLED ROTATING ANTENNA

Characteristics:

- VHF/UHF full channel with booster
 - Two directors, two dipoles good receptivity
 - Full-direction(350°) rotation
 - Infrared remote control and rotating
- Low noise, high gain, clear picture, good viece
 - Solid structure,waterproof
 - Easy to use and installation

MODEL NO: TA-851B

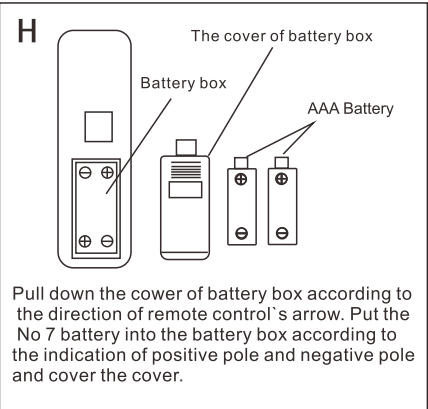

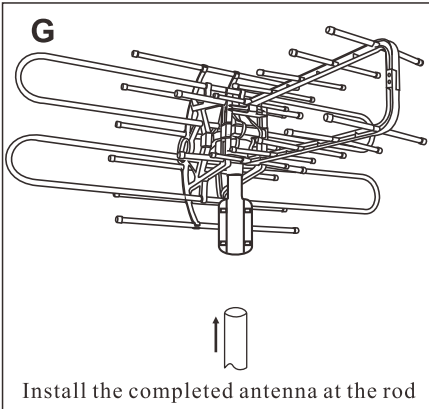

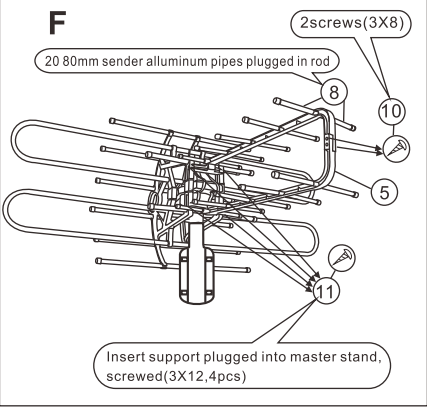

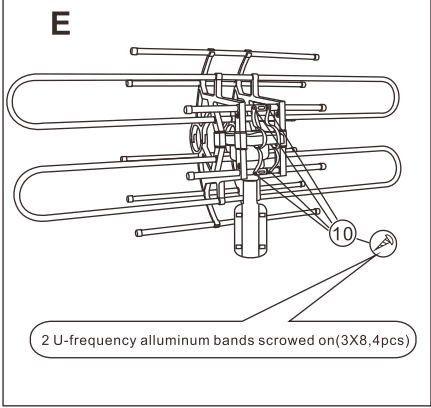

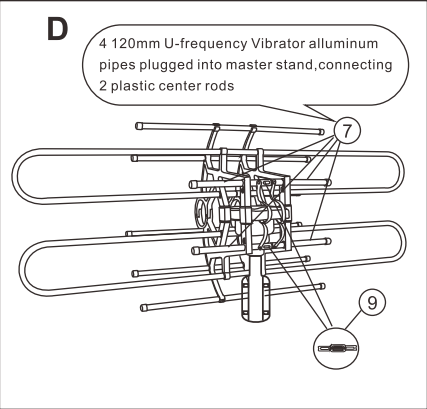

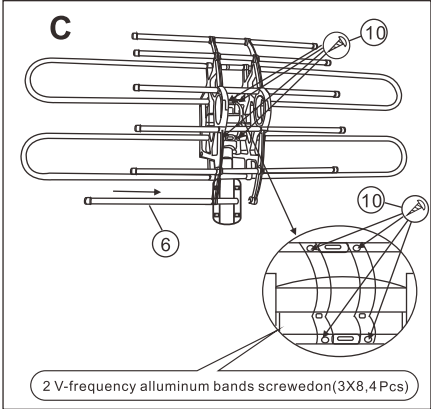

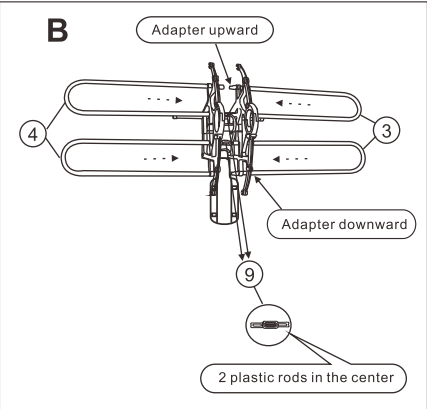

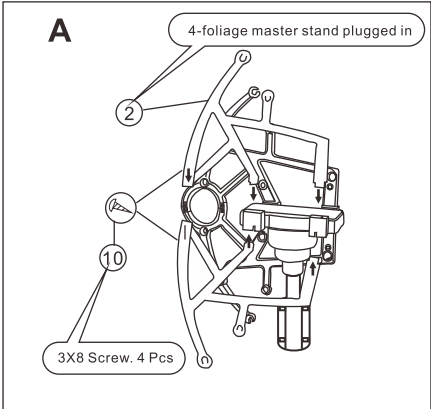

Caution:

1. Rotation motor and booster cannot be disassembled freely.
 2. Power supply should be kept 1M distance with TV. Switch it off when not used
3. Remote controller should be directed at the reception window.
 4. To adjust direction by pushing the button on the power supply.

Specifications

Channels	Frequency(MHz)	Gain(dB)	Rotation	Impedance(Ω)	Power
VHF 1-12	45-230	20-28	350°	75	110V-120V 50Hz/60Hz
UHF 21-69	470-860				

Notes

- 1.A geared-down engine,gearing wheel and low-noise microwave amplifier are built in the master.Only professional technicians are suggested to disassemble and assemble them.
- 2.Install according to the procedures shown in the diagram,Make sure everything is tightened.
- 3.Please use description and procedures shown in the dia gram,Make sure everything is tightened.
- 4.The antenna should be installed in a high position with few barriers around.
- 5.Power pack should be place 1m away from TV set.Don't place it on top of TV.Place it in a dry place and clean the dust occasionally.
- 6.When using remote controller,direct the remote-controller at the acceptor window of the power pack.
